1+ year experience

Paradox AI — paradox.ai

— *Front-end developer*

MAY 2021 - OCT 2022

— *Team Lead*

OCT 2022 - PRESENT

A US product company with Olivia - The AI Assistant that helps global recruiting teams spend more time with people by automating tasks like screening, scheduling, and candidate Q&A.

Google DSC — dscdut.com

— *Product lead — Mentor / Trainer*

JULY 2021 - JULY 2022

— *Community Lead — Mentor / Trainer*

JULY 2020 - JULY 2021

— *Front-end developer — UI Designer — Team Lead*

DECEMBER 2019 - JULY 2020

I joined GDSC as a front-end developer. I designed the interface of our website using Adobe XD and programmed it with Nuxt.js.

After spending one year at GDSC, I wanted to lead the community to building incredible products, and hold technology events for students on my campus.

Nestsera technology — nestsera.com

— *Front-end Lead*

JULY 2020 - MARCH 2021

As the front-end team leader, I defined the conventions, built the code base, and managed the team development process.

S-Group non-profit org — sgroupvn.org

— *Fullstack developer — Mentor / Trainer*

2017 - 2019

I joined S-Group and it was the first time I got my professional training in web development. Then I was trusted to be the trainer for the younger generation, which inspired me to build the developer community in our local area even stronger

Adobe After Effects
1+ year experience

LANGUAGES

Vietnamese (Mother language)

English (Advanced)

formkl, An open-source DSL for form module — *Author*

SEPTEMBER 2022 - PRESENT

Formkl (Form markup language) is an open-source DSL (Domain-Specific Language) to define and create form schema. It is designed to be simple, consistent, and highly readable as natural language. See more at https://formkl.org

thecodeorigin, A place to share your code bases — *Author*

2019 - PRESENT

I like building enterprise code bases so I created this project on GitHub as a place for my friends and me to share their project templates, and boilerplates with good practice. See more at https://github.com/thecodeorigin

UniGO, A digital map for universities — *Project manager*

MARCH 2021 - PRESENT

Knowing finding ways in the university can sometimes be hard since the place is so big (Danang University of Technology). Our team decided to make a digital map for tracking, showing information, scanning location QR codes, etc. We aim for freshmen, clubs, event holders, and organizations as our users. See more at https://unigo.pro

beebee.travel, A B2B platform for travel agency — *Founder*

DECEMBER 2020 (INACTIVE)

The COVID-19 pandemic is destroying our economy, especially tourism. Understanding this problem, me and my team at GDSC took a chance on building this platform for tour agencies and service providers in tourism.

SiP, A side-projects community — *Frontend developer, designer*

MAY 2020 - FEBRUARY 2021 (INACTIVE)

SiP - side-project community is a website to share your ideas, products, and look for partnership or mentorship, the project was initiated by our formal GDSC-DUT leader and had its first MVP.

MORE ABOUT ME

My full name is Nguyễn Hữu Nguyên Ý (Rim). I'm currently working at Paradox AI, I have had a very long time working with the Form component, which works like Google Form but with extra functionalities like Payroll, Tax form, and Data search,... I'm also leading a team in building a

micro-frontend project for the company to manage the application instance's performance and data reporting.

I've explored and used many technologies to get the jobs done: GCP, AWS, Nest.js, Express, React Native, Tensorflow with Python on raspberry pi, Vue, React, Angular...

I also worked with some freelancing Blockchain projects, I was in charge of Front-end development and built the logic with the crypto wallet (Solana network).

I love love love working for the community. My widest dream would be to see my city become a place where every technology dream can come true. Our practical work includes holding technology events and campaigns, teaching programming for students and children, and building awesome products to solve our local's problems.

I like kimbap, sushi, pizza, spaghetti, ice cream, and karaoke 😀
